Offline Participants: <https://chat.whatsapp.com/BdS62R1G0Kg6II8I0oyZVw>

Workshop Schedule:

1. The Workshop starts at 8:00 am.(Indian Standard Time). You can log in from 7:30am
2. We have designated 4 operating rooms for the workshop.
3. Our idea is to maximise the benefit for the viewers. At any one time 2 surgeries will be on the screen. This can be interchanged as per the situation of the procedure.
4. A moderator, a senior surgeon from Ganga Hospital will choose which surgery will be in the main and which will be in picture in picture.
5. Over the years, we have found this as a great way of doing the workshop since in every surgery, there are critical periods to see and standard times like closure at which time you can go on to another surgery. The choice is always available to come back to any surgery towards the end to see the final picture.
6. Audio will be connected to the operating surgeon whose surgery is in the main frame. At all times the delegates will be able to hear the moderator and the surgeon in the main frame.
7. Delegates wanting to ask questions, please type the questions in the chat box with your name and place. The moderator will pose the question to the surgeon with your name and the surgeon will answer or the moderator himself will answer (since we all belong to the same team). For those in the auditorium, the questions can be asked directly to the operating surgeon or through the moderators at the auditorium.
8. We do not encourage you sending questions in Whatsapp. Many have not given their Whatsapp number. We will use the Whatsapp group for technical support.
9. We will plan to show as many procedures as possible.
10. On both days the live surgery will start at 8:30 am. We hope to have about 8 hours of operating time!! Hope to have a wonderful time.

Dr S Raja Sabapathy
